DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 81-91 are rejected under 35 U.S.C. 102(b) as being anticipated by Davis et al. (US 5,784,441, hereinafter “Davis”).

Regarding claims 81-82, 87, Davis discloses an electric power notification device plugged into a wall socket (Figure 1) which derives power from the telephone line current during a power outage in order to report the power outage to the utility service provide via a telephone call (col. 11, lines 43-51).

Regarding claims 83-86, 88-91, the notification device waits a select random time period after power loss is detected before placing the telephone call (col. 5, lines 31-50).

Art Unit: 2643

Allowable Subject Matter

3. Claims 1-80 are allowed because the prior art of records fails to teach or fairly suggest a power status notification device reporting to an integrated voice response system (IVR).

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Leach shows another power outage notification system.
